1. Complete 3-Minute Winning Pitch Script

"Good morning respected judges and faculty! We are **Team Innov8** from First-Year Integrated M.Tech in AI-ML at Sanjivani University — led by **Samruddhi Rajesh Gangad** as Team Leader & UX Lead, **Pratik Thorat** as Full-Stack & AI Lead, along with **Kirti Honde** and **Parth Pachpute**.

When we joined Sanjivani, we saw every outstation student suffer from the exact same problem: local brokers charging **₹5,000 to ₹10,000 in commissions**, fake listings floating on WhatsApp, and students losing their security deposits. To permanently solve this, we built **NESTRO** — India's 1st AI-powered, 0% brokerage student housing platform.

NESTRO gives students **0% brokerage** direct host booking, **100% verified KYC stays** with geo-tagged photos, and a **bank-grade escrow system** that protects their money until physical check-in. And most importantly, **NESTRO is not just an idea — it is 100% LIVE right now at nestro.web.app!** Built on Google Cloud & Cloud Firestore, our custom **NEST AI** understands English, Hindi, and Marathi to match students with the best room based on walking distance to campus gates, curfew rules, and budget in under 3 seconds, while our **Priority Waitlist Tokens** manage rush during admission seasons.

We generate revenue through 4 asset-light pillars: **B2B Owner Success Fees** (₹500–₹1,000/bed), **Featured Spotlight Ads** (₹1,500/month), a **₹99 Micro Trust Fee** for legal escrow agreements, and our **NESTRO HostelOS SaaS** (₹499/month) for owners to automate rent collection.

Starting with our beachhead pilot here at **Sanjivani University & Kopergaon**, our playbook is ready to scale across **50+ Maharashtra campuses** to capture this ₹120 Crore market. You can **scan the QR code on the screen right now** to test our live app; we are **Team Innov8**, thank you!"

 2. Team Innov8 Structure & Roles

Member Name	Primary Role	Pitch Ownership / Q&A Area
Samruddhi Rajesh Gangad (Lead)	Team Leader & UX / Product Design Lead	Opening, Closing, Problem, Vision & UX
Pratik Thorat	Full-Stack Developer & AI / Technical Lead	Tech Architecture, NEST AI, Cloud & Security
Kirti Honde	Market Analysis & Student Relations	Market Opportunity, CAC & User Growth
Parth Pachpute	Operations & Host Onboarding	Hostel KYC, Owner Onboarding & Revenue Model

? 3. Top 9 Expected Judges' Questions & Answers

Q1: "If you offer 0% brokerage to students, how do you make money?"

ANSWER BY: PARTH / SAMRUDDHI

"Sir, while students browse and book completely free, we monetize through a 4-pillar asset-light B2B and micro-B2C model:

1. **Property Owner Success Fee:** Property owners pay ₹500 to ₹1,000 per filled bed upon move-in (80% cheaper than traditional broker commissions).
2. **Featured Spotlight Boosts:** Hostels pay ₹1,500/month during admission season for guaranteed top-3 search ranking.
3. **Student Trust & Move-In Fee:** A nominal ₹99 fee on move-in covering digital tenancy agreements and bank-grade escrow deposit protection.
4. **HostelOS SaaS:** ₹499/month for hostel owners to automate WhatsApp rent reminders and digital entry logs."

Q2: "How is NESTRO different from MagicBricks, NoBroker, or OLX?"

ANSWER BY: SAMRUDDHI (TEAM LEADER)

"Sir, platforms like NoBroker and MagicBricks are built for metro cities and family apartments, not Tier-2/Tier-3 college student housing. NESTRO solves 3 student-specific problems:

1. **Hyperlocal Campus Matching:** Exact walking distance from specific university gates and strict hostel curfew filters.
2. **Single Bed-Level Inventory:** We list single bed sharing options (2-sharing, 3-sharing) with real-time FIFO Priority Waitlist tokens during peak admission rushes.
3. **Digital Escrow Protection:** Deposits remain securely locked in escrow and are released to the host only after physical check-in."

Q3: "What does NEST AI actually do? Is it just a basic chatbot?"

ANSWER BY: PRATIK THORAT (AI / TECH LEAD)

"Sir, NEST AI is our proprietary multi-lingual matchmaking engine. It parses natural language prompts in English, Hindi, and Marathi to:

1. Compute real-time proximity to campus gates and filter rooms by budget, meal preferences, and curfew constraints in under 3 seconds.
2. Automatically assign and manage real-time FIFO Priority Waitlist tokens synced to Google Cloud Firestore when hostels reach full capacity.
3. You can test NEST AI right now on our live web app at `nestro.web.app`."

Q4: "Why would hostel owners list on NESTRO instead of using local brokers?"**ANSWER BY: PARTH / KIRTI**

"Sir, property owners are actively looking for alternatives because traditional brokers charge 1–2 months of heavy commission and bring unverified tenants. NESTRO offers owners:

1. Direct access to verified university students with zero upfront listing fees.
2. Guaranteed early occupancy through pre-admission priority waitlists.
3. A free digital HostelOS dashboard to manage tenant records and rent tracking. In our Kopergaon pilot, 6 major hostel owners are already onboarded."

Q5: "What happens if an owner refuses to refund a student's deposit or scams them?"**ANSWER BY: KIRTI / SAMRUDDHI**

"Sir, we have eliminated deposit fraud through our Digital Escrow Guarantee. When a student books a bed, the security deposit is held in a secure escrow holding account. Funds are released to the property owner only after the student physically inspects the room, checks in, and signs the digital tenancy contract. If the room does not match the listing, the student receives a 100% instant refund."

Q6: "You are First-Year students. How will you scale outside Sanjivani University?"**ANSWER BY: SAMRUDDHI / PRATIK**

"Sir, our business model is completely asset-light and campus-repackagable. Expanding to a new college town does not require physical offices. We deploy a 2-part playbook:

1. **Campus Ambassador Network:** 2 student leads per college to onboard local PGs and verify listings.
2. **Institutional University MoUs:** Partnering directly with colleges as their official off-campus housing platform. Our Phase 2 roadmap targets 15 colleges across Nashik, Shirdi, and Pune with 2,500+ beds."

Q7: "What is your Customer Acquisition Cost (CAC) and marketing strategy?"**ANSWER BY: KIRTI HONDE**

"Sir, our student acquisition cost is near zero (under ₹20 per student) because we tap directly into existing campus channels:

1. Official fresher WhatsApp groups, admission counseling desks, and campus orientation noticeboards.
2. A viral student referral loop — every student who saves ₹5,000 in brokerage naturally refers their batchmates."

Q8: "How do you handle legal agreements and rent compliance?"**ANSWER BY: PARTH / SAMRUDDHI**

"Sir, upon booking confirmation, NESTRO automatically generates a standardized Digital Tenancy Agreement PDF documenting rent terms, deposit refund conditions, inventory checklist, and curfew rules. Both the student and property owner receive digital copies with verifiable timestamps."

Q9: "What is your long-term future vision for NESTRO?"**ANSWER BY: SAMRUDDHI / PRATIK**

"Sir, our vision is to make NESTRO the default Operating System for Student Life in India across 3 phases:

1. **Phase 1 (Housing Layer):** Expanding to 15+ campuses in Nashik, Shirdi, and Pune with 2,500+ verified beds.
2. **Phase 2 (FinTech & Trust Layer):** Native Android/iOS apps with Instant UPI Escrow, automated roommate rent-splitting, and digital agreements.
3. **Phase 3 (Student Super-App):** Integrating verified campus student IDs, second-hand book & appliance exchanges, and meal plan subscriptions.

In short: Whenever an Indian student leaves home for college, they should be able to find a safe, verified, broker-free home on their phone in under 60 seconds."
